There's a shopping list for O'Reilly's that I need to get non detergent, I think like three quarts of non detergent sae 330 oil. I need to get an oil filter for the scag. I also need to get a fuel filter for the scag. And I need to get lithium grease sky. And I [REDACTED] replace the air filter last year so should be getting the air filter need to sharpen some blades to go ahead and drop the blades off and sharpen. I need to pick up a metal file from O'Reilly's may have a nice middle file, when I pick up a metal file and we'll use the metal file to help to grind down the blades. Keep them sharp do that by hand. And, yeah, and maybe a couple cans of Rhino liner if I need to. But yeah sharpen blades and get this stuff up in the lithium grease because I'm not a lithium grease the mower. So, alright.
